This symposium intends to attract researchers from both academia and dental practice conducting analytical, numerical, clinical and experimental studies on design, modelling and characterization of advanced materials and devices for dental medicine applications.

Papers are welcome in all areas of dental medicine. Topics of interest include:

- dental materials
- dental devices
- ergonomics
- prosthodontics
- implants
- occlusion
- orthodontics

and others where there is an important contribution to advanced materials development and dental device design processes

Abstracts of two full pages should be written in the following format (the template is available in the web site specific section).
